

12 Week Household Waste Audit

– Apartment Living

Around the world, 'Bin Systems' come in all shapes, sizes and colours. This table is for Households that have **SHARED** waste collection systems, such as apartment complexes.

To help you audit your household waste, use this table to track your progress. Estimate and circle how many 'bags' or 'boxes' of waste left your apartment each week. Full each coloured bin is, before your waste collection day. After 12 weeks add up your total score.
